

Corporate Profile

K12 is a technology-based education company providing proprietary curriculum and educational services to students in kindergarten through 12th grade. A leader in the growing online education industry, K12 uses online delivery through virtual public schools to provide children access to a high-quality public school education regardless of their geographic location or socio-economic background.

We have developed an engaging curriculum which includes online lessons delivered over our proprietary school platform. We combine this with a rigorous system to test and assess students and processes to manage school performance and compliance. In addition, our professional development programs enable teachers to better utilize technology for instruction. Our end-to-end learning system is designed to optimize the performance of the schools we serve and enhance student academic achievement.

Founded in 2000 and headquartered in Herndon, Va., K12 provides products and services to virtual public schools in 21 states as of the beginning of the 2008-09 school year.
